The Garrison database is in draft form at present. This is in order to stress test the database, as it contains over 110,000 service records. The records are drawn from mainly French repositories and record service for the English crown, in the occupation of Normandy from 1415 - 1453. The data currently accessible here are accurate, but are not fully complete at the moment. We will add more information about these data and where they are drawn from shortly.
